

IN THE SPECIFICATION:

Please amend the paragraph starting on page 12, line 18 as follows:

Figure 1 shows a pair of transceivers 1 for use by divers. Each transceiver comprises a metal casing 2 on one end of which is mounted a pair of spaced acoustic hydrophones 4 for receiving acoustic signals. A single acoustic transducer 3 for transmitting acoustic signals is mounted at the top of one major face of the casing, immediately above a window of a display 5[[:]]. Below the window are four push button switches 6. The whole of the transceiver is designed to resist water ingress under pressures likely to be encountered during diving. Although separate transmitting and receiving transducers are shown, it is possible to provide[[:]] a transceiving transducer or transducers which provide both functions.
